

ABSTRACT OF THE DISCLOSURE

Novel aromatic vinyl ether compounds are represented by following Formula (1) or (2):

wherein R and R' are each a hydrogen atom or a group represented by following Formula (3):

wherein R<sup>a</sup>, R<sup>b</sup>, and R<sup>c</sup> are each a hydrogen atom or an alkyl group having 1 to 4 carbon atoms; R<sup>1</sup>, R<sup>2</sup>, R<sup>3</sup>, R<sup>4</sup>, R<sup>5</sup>, R<sup>6</sup>, R<sup>7</sup>, and R<sup>8</sup> are each a hydrogen atom or a substituted or unsubstituted hydrocarbon group; W is a single bond or a linkage group; m, n, p, q, r, s, t, u, v, and x are integers in specific ranges, at least one of pRs in Formula (1) is the group of Formula (3),

and at least one of uRs in Formula (2) is the group of Formula (3). These aromatic vinyl ether compounds are useful as, e.g., curing agents for cationic polymerization.
